

## REDUCE

## Dear Young Recyclers,

Having fun and taking care of our environment go together naturally. This coloring book gives you some fun activities that will help you and your family think about ways to protect our Earth by recycling.

We can reuse many bags, boxes, and other containers to help reduce the amount of trash created. This booklet will show you some of the common items thrown away that actually qualify for recycling into new items.

Check with local waste service companies in your area for available recycling options. Many have curbside service or sorting facilities. For more information on how Michigan recycles, visit www.michigan.gov/egle/about/organization/materials-management/recycling.

Always try to reduce, reuse and recycle as much as you can!

Prepared by the Michigan Legislature

## What Is RECYCLING

 ? ? ?Recycling is one of the best ways to protect our Earth and its natural resources.
Recycling is when used materials like old newspapers and milk jugs are turned into new items!

Newspapers can be used to make notebook paper. Plastic bottles can make a park bench!
Recycling is a great way each of us can help to make a really big difference!

Just like this optical illusion...

Use the color key below to color this optical illusion.

## What Can Recycling Do?

Used aluminum and tin cans...

...can be turned into brand-new cans!

Used glass bottles and jars...

Used plastic bottles...

...can be turned into yard furniture!

...can be turned into new paper, toilet paper, and paper towels!

The top arrow represents all of us who collect recyclable materials and put them in our curbside pick-up bins or take them to our community recycling centers.

The second arrow represents these materials being made into new things, like used office paper into notebook paper and plastic milk jugs into new playground toys!

The third arrow is the most important of all! It represents people buying products made with recycled materials. This closes the "loop" and completes the process.

Connect the dots below to create your own RECYCLING symbol.

${ }^{6}$

## Michiganders Play Outdoors ALL Year Long!

Don't litter! Put trash in the right place.

## Pitch In To Keep Our State Clean, EVERY DAY!

How many new words can you make using the letters from the word RECYCLING? Write your new words on the lines below. grin
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## PLASTIC CAN BE RECYCLED

## Check with your local

recycling center to see if you need to crush plastic bottles before placing

## REMEMBER:

 Caps and plastic rings may not need to be removed before recycling. Check with your local recycling center first!

## REMEMBER: Look on

 the bottom of all plastic bottles -\#1 and \#2 bottles can be recycled in most programs!

Did you know there are many different types of plastic?
Look on the bottom of plastic containers for a little triangle with a number inside. These numbers range from 1-7 and identify the type of plastic used.

Not all plastics can be recycled. Check with your local recycling center for which types of plastic can be recycled.

## PAPER can be recycled

Did you know that you can buy toilet paper, paper towels, and stationery made from recycled paper?

Did you know that cardboard can be made from recycled paper grocery bass?

paper bags your recycling in when you are at the
store. Try to buy these and help complete the RECYCLING LOOP!

## GLASS CAN BE RECYCLED

8

## METAL CAN BE RECyCled

REMEMBER!
REMEMBER:
To rinse out all containers for recycling!

DID YOU KNOW?
Aluminum foil, that has been used but does not have food scraps or grease on it, can be recycled in most communities!

## Help Your Curbside Recycling

 Make It To The Center!Recycling is fun, easy and helps pick up.
You can usually recycle your glass, metal, plastic, and cardboard all together in your curbside bin! This makes it easy for you and quick for

The recycling trucks in your community pick up the materials in curbside bins and transport them to the recycling center. There they can be processed into new things to use!

# Recycle Your Yard Waste The Natural Way! 

## What is composting?

Composting is when leaves, grass, and other organic material breaks down into a rich, soil-like substance.

## What is a good size for my compost pile?

Your compost pile should be a minimum of 3 feet wide by 3 feet tall by 3 feet deep in order to be large enough to maintain the heat necessary for composting. You can make a pile as long as you want, but don't make it more than 5 feet high.

What are the benefits of composting at home?

- Saves the time and trouble of bagging yard waste
- Reduces the need for fertilizer-use your own compost instead!
- Saves the cost of yard waste bags or cans
- Saves landfill space

Can you find these TEN words below?
They are hidden in the puzzle and all relate to recycling.
MILK JUG GRASS CLIPPINGS
RECYCLE COMPOSTING
USED OIL NEWSPAPER
TIN CANS MULCH
LEAVES
GLASS

Get out your crayons
and color the
Earth Day Tree. Start a new tradition and plant a tree each year!
 Earth Day!

REMEMBER:
1 - Start by learning about recycling and contacting your local center to see how to begin.
2 - Share your recycling knowledge with neighbors, friends and family members.
3 - Have fun recycling!

## There are many other things that can be RECYCLED or REUSED!

Check with your local recycling center or retail stores for more information about recycling electronics, appliances, and other items you can't recycle curbside or at a drop-off center.
