208.1432a Tax years beginning after December 31, 2011 and before January 1, 2016; tax credit; electricity; "qualified consumption of electricity" defined.

Sec. 432a. (1) For tax years that begin after December 31, 2011 and before January 1, 2016, a qualified taxpayer that has received a certificate under section 432 may claim a credit equal to the product obtained by multiplying the qualified consumption of electricity times the difference between the guaranteed cost of electricity and the actual delivered price of electricity billed to the qualified taxpayer under a tariff rate approved by the public service commission or the projected cost of electricity, whichever is less.

(2) If the credit allowed under this section exceeds the tax liability of the qualified taxpayer for the tax year, the qualified taxpayer may elect to have that portion that exceeds the tax liability of the qualified taxpayer refunded or to have the excess carried forward to offset the tax liability in subsequent years for 10 years or until used up, whichever occurs first.

(3) As used in this section, "qualified consumption of electricity" means up to 1,445,400 megawatt hours of electricity consumed during the tax year at a facility described by an agreement entered into under section 432.
