NOTES: Cities that cross county lines are split between the pertinent counties, and each part of the city is followed by the designation "(pt.)".

Villages with population in two or more townships are split between the pertinent townships and each part of the village is followed by the designation "(pt.)".

Villages are part of the township(s) in which they are located. The total population of a township which contains villages is obtained by adding the population of its villages to the "balance" of the township.

The total population of cities and villages with multiple parts appears in the tables "Michigan Cities that Cross County Boundaries in the 2000 Census" and "Michigan Villages with Population in Two or More Townships in the 2000 Census."

The census counts in this table are subject to correction through the Census Bureau's Count Question Resolution program.
