SUMMARY OF HOUSE BILL 4478 as passed by the House:

The bill would amend the Lottery Act to require the Lottery Commissioner, when determining the placement of lottery terminals, to take into account with equal emphasis the total instant game sales for the three months immediately preceding a market evaluation and the need to maximize net lottery revenues from the total number of terminals placed.

The Act currently requires the Commissioner to promulgate rules pursuant to the Administrative Procedures Act concerning the types of locations, without limit as to number, at which tickets or shares may be sold. The bill would subject this to the above provision.
