Senate Bill 486 (as reported without amendment)  
Sponsor: Senator Wayne Kuipers  
Committee: Health Policy

Date Completed: 6-1-07

**RATIONALE**

According to Michigan Community Blood Centers, about 38,000 pints of blood are used every day in the United States. These blood transfusions reportedly save 4.5 million American lives every year. Shortages in the blood supply are not uncommon, however, especially during the summer months and winter holidays.

increase in demand for blood and blood products. Shortages occur frequently, especially among specific blood types. Allowing 16-year-olds to donate blood would help alleviate the shortages and save lives. Additionally, the bill would create a new opportunity for 16-year-olds to engage in valuable community service.

Under Public Act 22 of 1971, an individual who is at least 17 years old may donate blood in a voluntary and noncompensatory blood program without obtaining his or her parent's or legal guardian's permission or authorization. In order to increase the number of eligible blood donors, it has been suggested that 16-year-olds also be allowed to donate, with parental consent.

Legislative Analyst: Julie Cassidy

**FISCAL IMPACT**

The bill would have no fiscal impact on State or local government.

Fiscal Analyst: David Fosdick

**CONTENT**

The bill would amend Public Act 22 of 1971, which prescribes the age at which an individual may donate blood, to allow a person who was 16 years old to donate blood in a voluntary and noncompensatory blood program with his or her parent's or legal guardian's permission or authorization. The bill also would name the Act "Jenna's Law".

MCL 722.41

**ARGUMENTS**

*(Please note: The arguments contained in this analysis originate from sources outside the Senate Fiscal Agency. The Senate Fiscal Agency neither supports nor opposes legislation.)*

**Supporting Argument**

While the number of blood donations has increased, it has not kept up with the
