

DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET

JOHN E. NIXON, CPA, DIRECTOR/STATE BUDGET DIRECTOR

George W. Romney Building
111 S. Capitol Avenue
Lansing, MI 48909
www.michigan.gov/dtmb

The Department of Technology, Management and Budget (DTMB) provides state agencies with all technology services, as well as centralized business services, to allow for streamlined government operations. In addition to meeting all of the technology needs of the agencies, some of the key business services include budgeting, audit, employee resources, financial services, fleet management, mail, printing, property management, purchasing services, records management, and retirement services. The department also provides data on occupational wages, job outlooks, industry forecasts and employment statistics for the state of Michigan. The department includes several key units of state government, including the offices of the Chief Information Officer, the State Budget Director, the State Employer, the Bureau of Labor Market Information and Strategic Initiatives, and the Civil Service Commission.

The department derives its legal authority from the Management and Budget Act, Act 431 of 1984, as amended, and several executive orders. It is the summation of the former Department of Administration, which was created by Act 51 of 1948, as well as functions that had been under the office of the governor, such as budgeting, that were transferred by Executive Order No. 1973-7. Executive Order 2009-55, issued December 30, 2009, and effective March 21, 2010, combined the former Departments of Management and Budget (DMB) and Information Technology (MDIT) into the Department of Technology, Management and Budget.

The **Director's Office** provides direct management and oversight for strategic planning, public information, enterprise security, and enterprise development. The critical functional areas within DTMB are outlined in the following paragraphs.

The **State Budget Office** is responsible for coordinating all Executive Budget activities, including development of the Executive Budget recommendation, presentation of the budget to the legislature and implementation of the budget after enactment. The **State Budget Director** is appointed by the governor and is a member of the governor's cabinet. The State Budget Director serves as the governor's advisor on fiscal matters and also oversees the state's accounting and payroll functions, the state's financial management system, the state internal audit responsibilities, and the collection and reporting of data about the performance of Michigan's public schools and students. The current director of DTMB also serves as State Budget Director.

The **Chief Information Officer (CIO)** reports to the DTMB Director and is ultimately responsible for the information technology services for state government. Functions overseen by the CIO include the following:

The **Office of Enterprise Security (OES)** is accountable to the DTMB Director for identifying, managing, and mitigating IT security risks and vulnerabilities within State of Michigan government computing. OES is also charged with the oversight of disaster recovery planning, IT security risk management, IT security awareness and training, working with state agencies to assist with their security issues, and enforcement oversight of state security policies and procedures intended to maintain suitable levels of system and network security.

The **Agency Services Administration** within DTMB serves as the liaison between the department and the individual executive branch agencies. This team is responsible for maintaining the technology business relationships between DTMB and its agency customers. The services include managing agency IT plans and ensuring the timely delivery of agreed upon IT services. The staff members of this administration work across all agencies to identify common technology needs — so that DTMB can leverage the state's IT resources, and thereby create cost savings while delivering more timely services. The Agency Services Administration oversees the operational management of more than 2,100 IT applications for state agencies.

The **Infrastructure Services Administration** within DTMB provides for field services, telecommunications, data center services, enterprise architecture, office automation, and technical services. With over 58,000 laptops and desktops and 32,110 applications in operation, DTMB works to provide a single desktop environment that supports all the business needs of the different state agencies and departments. Field technicians across the state maximize end-user productivity by providing on-site support services to resolve computer problems and equipment failures. The department is responsible for the acquisition of hardware and software, as well as operational and technical support for a variety of mainframes and 3,741 servers. Other responsibilities include network management, phone systems, data storage, e-mail, and system monitoring.

The **Michigan Public Safety Communications System (MPSCS)** is housed within DTMB's Infrastructure Services Administration and serves as Michigan's primary communications system for emergency response personnel. With more than 241 towers, 54,000 radios, and covering an area of more than 58,000 square miles, the MPSCS is the largest single public safety communications system in North America. It provides interoperable voice and data communications for many of Michigan's first-responders and state government agencies.

The DTMB **Chief Deputy Director** oversees the management and administration aspects of the department. These functions include:

The **State Building Authority (SBA)** provides the capital financing to acquire, construct, furnish, equip, and/or renovate buildings for the use of the state, including public universities and community colleges pursuant to Act 183 of 1964. Since its creation, SBA has financed approximately 280 projects, approaching \$5 billion in construction costs. SBA bond issues permit the construction of needed capital outlay projects, which otherwise might be delayed or canceled due to state fiscal constraints, by spreading their costs over a portion of the project's useful life. In addition to capital outlay financing, SBA houses non-employee risk management functions for the state. It provides state agencies with commercial property, general liability, aviation, and builder's risk insurance, as well as other needed insurance coverage. The SBA also administers the state's Vehicle Self-Insurance Fund. The Vehicle Self-Insurance Fund covers liabilities arising from accidents involving the state vehicle fleet which numbers in excess of 10,000 vehicles.

The **Office of Retirement Services (ORS)** is an innovative retirement organization driven to empower customers for a successful today and a secure tomorrow. The Office of Retirement Services (ORS) administers retirement programs for Michigan's state employees, public school employees, judges, and state police. ORS serves over 500,000 customers, including 268,400 active and 241,400 retired members representing approximately one out of every 18 Michigan residents, including customers living in approximately one out of every 9 Michigan households. Within these systems, ORS administers 4 defined benefit pension plans, 2 defined contribution pension plans, and one defined benefit plus a defined contribution plan with combined net assets of nearly \$47 billion. ORS is responsible for the 14th largest public pension system in the U.S., the 21st largest pension system in the U.S., and the 44th largest pension system in the world. In fiscal year 2010, ORS paid out \$5.6 billion in pension and health benefits.

The Judges Retirement System was created under Public Act 234 of 1992. The Michigan Public School Employees Retirement System is administered under the provisions of Michigan's Public Act 300 of 1980. The State Employees Retirement System was created under the provision of Public Act 240 of 1943. Finally, the Michigan State Police Retirement System is operating under Public Act 182 of 1986. In fiscal year 2010, the market value of the Defined Benefit Plan assets totaled more than \$50 billion and over \$4.3 billion for the Defined Contribution/Deferred Compensation Plan.

Purchasing Operations provides both transactional and strategic sourcing services to state agencies for the acquisition of essential goods and services. Purchasing Operations currently oversees a portfolio of 1,100 cross-functional contracts valued at nearly \$18 billion.

Through the administration of a competitive bid process coupled with renegotiation of existing contracts, Purchasing Operations has delivered more than \$769.2 million in cost savings and avoidance to the state since 2008.

Purchasing Operations continues to position itself as a leader among Michigan public entities through its award-winning cooperative purchasing program, MiDEAL. The program extends more than 350 of the state's contracts to participating public entities including cities, counties, townships, villages, school districts, intermediate school districts, nonprofit hospitals, higher education institutions, and community colleges. Not only does the cooperative leverage combined buying power to ensure the most beneficial pricing for goods and services, it also aims to ease the administrative cost and effort otherwise incurred by member entities in the procurement of such goods and services.

The **Facilities Administration** manages and maintains office buildings throughout the state of Michigan, providing parking and security services for the managed facilities. Facilities Administration also provides facility design and construction management services for state agencies and colleges and universities implementing infrastructure improvements and new construction projects. Facilities Administration strategically manages the state's portfolio of owned and leased space, providing agencies with services to meet changing space requirements, as well as handling land and surplus property dispositions.

Financial Services offers a broad range of services to DTMB operating units, including accounting services, departmental procurement and accounts payable processing, financial analysis, business planning, management level reporting, performance measurement and management, automated billings, data collection and interfaces, and contract/lease management. Financial Services also serves as audit liaison with the Auditor General's office. A key objective is the simplifying of costs through rated services for other state government agencies. Human Resources functions are included in this area, providing services important to employment in DTMB, including traditional human resource support, such as recruitment, classification, payroll and benefits, labor relations and leave administration. In addition, safety and health services, as well as human capital management, are managed within this area.

Other key business services provided by the DTMB include Vehicle and Travel Services (VTS), Federal Surplus, State Surplus, Records Management, Printing Services, Mail and Delivery Services, and Warehouse Services. VTS provides centralized fleet and travel services for state agencies and colleges and universities. The fleet inventory includes all motorized vehicles and off-road equipment for all departments except the Michigan Department of Transportation, and a small number owned by Military and Veterans Affairs and the Department of Natural Resources. Printing Services offers a wide variety of design, printing, and bindery services. The Consolidated Print Center (CPC) provides high-volume mainframe and network print services to all state agencies.

Under Executive Order 2007-30, the **Civil Service Commission** operates as an autonomous entity under DTMB, with its administrative powers vested in the State Personnel Director, the commission's principal executive officer. The Civil Service Commission, through the State Personnel Director and staff, has overall responsibility for regulating conditions of employment for classified civil service workers in all of the departments of the executive branch of state government.

The **Office of the State Employer** carries out the central labor relations responsibilities as the employer of the state classified work force and represents the governor, the executive branch departments and agencies, and the legislative auditor general in all employee relations matters. The office is also responsible for all activities associated with workers' compensation, long-term disability, disability management, return to work, safety and health, health promotion, and employee services.

The **Office of Children's Ombudsman**, also housed within DTMB, was created by the legislature in 1994 as an autonomous entity. The Children's Ombudsman Act (PA 204 of 1994) provides that the office is responsible for monitoring and ensuring compliance with relevant statutes, rules, and policies pertaining to children's protective services and the placement, supervision, and treatment of children in foster care and adoptive homes.
