Senator Jim Runestad of the 23rd District offered the following invocation:

O God our Father, we pray that the people of America, who have made such progress in material things, may now seek to grow in spiritual understanding. For we may have improved the means, but not improved the ends. We may have better ways of getting there, but we have no better places to go. We can save more time, but we are not making any better use of the time we have.

We need Thy help to do something about the world's true problems—the problem of lying, which is called propaganda; the problem of selfishness, which is called self-interest; the problem of license, disguising itself as liberty; the problem of lust, masquerading as love; the problem of materialism, the hook which is baited with security.

Hear our prayers, O Lord, for the spiritual understanding which is better than political wisdom, that we may see our problems for what they are. This we ask in Jesus' name. Amen

The President, Lieutenant Governor Gilchrist, led the members of the Senate in recital of the *Pledge of Allegiance*.

Senator Johnson entered the Senate Chamber.

**Senate Resolution No. 67.**

A resolution to recognize September 2023 as National PACE (Programs of All-Inclusive Care for the Elderly) Month.

Whereas, The PACE model enables nursing home-eligible individuals to live in the community as long as possible. PACE is successful at keeping more than 95 percent of its enrollees in the community and out of nursing homes; and

Whereas, PACE is a quickly growing care model that has been in operation for more than 30 years. Michigan's first PACE program opened in 1995. Today, Michigan has 14 PACE organizations in 25 sites, serving over 5,000 participants; and

Whereas, The PACE Association of Michigan was formed in 2015 to support, safeguard, and expand Michigan PACE programs and initiatives through education and advocacy in order to enhance the lives of PACE participants and their caregivers; and

Whereas, During the pandemic, PACE organizations adapted the model in a number of ways to increase the safety of staff and participants. The programs provided further support and training for family caregivers when they are available to provide care. PACE programs have also utilized telemedicine interventions from telephone calls to specialized technology. They have worked to find new ways to engage participants who often miss their friends at the PACE center. Each PACE center also operates a clinic; and

Whereas, Programs like PACE deliver much needed medical and supportive services, encompassing the entire continuum of care and services for seniors with chronic care needs, while also maintaining independence for individuals in their home for as long as possible. This allows older adults who meet state eligibility criteria for nursing home level of care to continue living in the community with the coordination of the interdisciplinary team; and

Whereas, PACE programs are innovative as they assume full financial risk for all medical care and related services, including transportation, hospitalization, and long-term care, in return for capitated payments from Medicare and Medicaid. This controls costs for the state, while providing improved health outcomes and greater satisfaction for participants; now, therefore, be it

Resolved by the Senate, That the members of this legislative body recognize September 2023 as National PACE (Programs of All-inclusive Care for the Elderly) Month.

The question being on the adoption of the resolution,

The resolution was adopted.

Senator Victory was named co-sponsor of the resolution.

Senator Wojno asked and was granted unanimous consent to make a statement and moved that the statement be printed in the Journal.

The motion prevailed.

Senator Wojno's statement is as follows:

I'd like to ask for your support of my resolution today, declaring September as National PACE Month in the state of Michigan. As you know, Michigan has 26 PACE sites across our state working hard to help older adults live independently in their communities. Additionally, we have ten guests from throughout the state today representing PACE who are in the west Gallery. If they could please stand up and be recognized.

Senator Huizenga offered the following resolution:

**Senate Resolution No. 68.**

A resolution to recognize September 2023 as Cholesterol Education Month and September 1, 2023, as Low-Density Lipoprotein Cholesterol (LDL-C) Awareness Day.

Whereas, The American Heart Association (AHA) defines cholesterol as a waxy, fat-like substance circulating in the blood; and

Whereas, The Centers for Disease Control and Prevention (CDC) identifies two types of cholesterol: low-density lipoprotein cholesterol (LDL-C) and high-density lipoprotein (HDL-C); and

Whereas, LDL-C contributes to fatty build ups in the arteries, and HDL-C carries the LDL-C away from the arteries and back to the liver; and

Whereas, High cholesterol, also called hypercholesterolemia, is the chronic presence of high levels of LDL-C in the blood that can lead to cardiovascular disease; and

Whereas, The AHA explains that cardiovascular disease can refer to a number of conditions including heart disease, atherosclerosis, heart attack, stroke, heart failure, arrhythmia, and heart valve problems; and

Whereas, According to the CDC, nearly 94 million adults in the United States have high cholesterol; and

Whereas, The CDC estimates that someone in the United States has a heart attack every 40 seconds, but 80 percent of heart attacks are preventable; and

Whereas, The Michigan Department of Health and Human Services (MDHHS) co-leads the Michigan Million Hearts Initiative along with AHA of Michigan, which is committed to the effective use of clinical and community strategies to diagnose and treat people with heart disease and its risk factors; and

Whereas, MDHHS' Cardiovascular Disease Dashboard data from 2011-2019 found a 9.4 percent prevalence of cardiovascular disease among Michigan adults age 18 years and older; and

Whereas, Heart disease accounted for 76 percent of disease hospitalizations between 2016 and 2019, as reported by MDHHS; and

Whereas, AHA indicates that cardiovascular disease disproportionately affects minority populations; and

Whereas, AHA data also reports that, from 2015-2018, 60.1 percent of Black men and 58.8 percent of Black women over the age of 20 had cardiovascular disease, compared to 52.3 percent of Hispanic men, 42.7 percent of Hispanic women, 53.6 percent of white men, and 42.1 percent of white women; and

Whereas, Researchers with the Family Heart Foundation found that despite the availability of effective treatments for high cholesterol, 71 percent of hypercholesterolemia patients at high risk for heart attack and stroke never achieve LDL-C levels below recommended thresholds; and

Whereas, The LDL-C Action Summit, a consortium of the nation's leading cardiovascular stakeholder groups, seeks to cut cardiovascular events in half by 2030; and

Whereas, The CDC's Million Hearts Program is a national initiative to prevent one million heart attacks and strokes between 2022 and 2027; and

Whereas, The CDC views high cholesterol as a modifiable risk factor for cardiovascular disease, including heart and stroke; and

Whereas, September is recognized as national Cholesterol Education Month to raise awareness of cardiovascular disease and the importance of knowing one's LDL-C number; now, therefore, be it

Resolved by the Senate, That the members of this legislative body recognize September 2023 as Cholesterol Education Month and September 1, 2023, as Low-Density Lipoprotein Cholesterol (LDL-C) Awareness Day; and be it further

Resolved, That we urge healthcare providers to treat all cardiovascular disease patients in accordance with the American College of Cardiology's treatment guidelines; and be it further

Resolved, That we urge MDHHS to update the state's cardiovascular plan to accelerate quality improvements and measures to achieve improved health outcomes for cardiovascular disease patients.

The question being on the adoption of the resolution,

The resolution was adopted.

Senators Santana, Victory and Webber were named co-sponsors of the resolution.

Senator Huizenga asked and was granted unanimous consent to make a statement and moved that the statement be printed in the Journal.

The motion prevailed.

Senator Huizenga's statement is as follows:

Senate Resolution No. 68 recognizes September 2023 as Cholesterol Education Month and September 1, 2023, as Low-Density Lipoprotein Cholesterol Awareness Day. Heart disease is the No. 1 killer of both men and women in the United States, and high LDL cholesterol is a leading cause of the most-preventable disease. Unfortunately, many people don't have a good understanding of their risk for heart disease or their cholesterol levels. Raising awareness can help address this problem and save lives.

There are two types of cholesterol—LDL, commonly known as bad cholesterol, contributes to fatty buildups in the arteries; and high-density lipoprotein cholesterol, or good cholesterol, carries the LDL away from the arteries and back to the liver.

The American Heart Association indicates that cardiovascular disease disproportionately affects minority populations. The data, in fact, reports that in 2015 to 2018, over 60 percent of Black men and nearly 59 percent of Black women over the age of 20 had cardiovascular disease; compared to 52 percent of Hispanic men and 42 percent of Hispanic women, and 53 percent of white men and 42 percent of white women.

September is recognized as National Cholesterol Education Month to raise awareness of cardiovascular disease and the importance of knowing one's cholesterol number. With this resolution, we urge Michigan residents to learn their LDL level, health care providers to follow the guidelines when treating all cardiovascular disease patients, and the Michigan Department of Health and Human Services to update the state's cardiovascular plan to improve health outcomes for patients.

**House Concurrent Resolution No. 5.**

A concurrent resolution to urge the United States Congress, Department of Defense, and Department of Veterans Affairs to prioritize research and investment in non-technology treatment options for servicemembers and veterans who have psychological trauma as a result of military service.

Whereas, The men and women who voluntarily sign-up to serve our nation in the United States Armed Forces, and the additional uniformed services, generally do so with an understanding that such service may ultimately impact their physical and mental well-being. Even with this knowledge, they still answer the call to serve; and

Whereas, Members of the active-duty Air Force, Coast Guard, Marine Corps, Navy, and Space Force, and their reserve components, the Army and Air National Guard, may have experiences that increase the risk for developing behavioral health problems, including traumatic brain injury, post-traumatic stress disorder, and depression. Effective treatment options for these conditions vary from servicemember to servicemember; and

Whereas, Upon return from a deployment, members of the reserve components and the National Guard are demobilized and must reintegrate back into civilian life, while simultaneously losing access to the full range of services offered by the military health system and having to emotionally deal with the same experiences as their active-duty counterparts; and

Whereas, Non-technology treatment options, such as buddy-to-buddy programs, controlled use of psychedelics in clinical settings, outdoor therapy, and easier access to service animals, among others, have shown promise to help veterans improve their mental health and find a new normal while dealing with the invisible wounds of war and service; and

Whereas, The families of servicemembers must also not be forgotten, and resources should be made available to help them understand and assist their loved ones who may be suffering from psychological trauma. Family members of servicemembers or veterans with behavioral health problems may experience family violence and aggression, lower parenting satisfaction, and child behavior problems. Resources should include services that will help family members deal with the impacts of their family members' service; and

Whereas, The need to address veteran mental health is of key importance in Michigan. In 2021, it was reported that there were 554,281 veterans living in Michigan, making Michigan rank eleventh out of fifty-three states and territories in veteran population. However, between 2016 and 2020, it was reported that there were 882 Michigan veterans who died by suicide; now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That we urge the United States Congress, Department of Defense, and Department of Veterans Affairs to prioritize research and investment in non-technology treatment options for servicemembers and veterans who have psychological trauma as a result of military service; and be it further

Resolved, That copies of this resolution be transmitted to the Speaker of the United States House of Representatives, the President of the United States Senate, the Chair and Ranking Members of the Committees on Veterans Affairs and Armed Services, and the members of the Michigan congressional delegation.

The House of Representatives has adopted the concurrent resolution.

The question being on the adoption of the concurrent resolution,

The concurrent resolution was adopted.
